

Article 11 - Fire Safety

This distinguishes between multi-unit dwellings and rental units that do not form part of a multi-unit dwelling.

- (i) Multi-unit dwellings will be required to contain a mains-wired smoke alarm, a fire blanket, emergency lighting in common areas and an emergency evacuation plan.
- (ii) Rental units that do not form part of a multiple unit (i.e. houses) must have a fire blanket and either a mains-wired smoke alarm or at least two 10-year self-contained battery-operated smoke alarms.
