

Invasive Species Week

Commences on
Friday March 23rd 2018

Launch of Invasive Species Tracking App for iPhone and Android

You can easily identify and report Invasive plants you see, and view reports on a map. Once reported the information will help track the extent of these invasive plants throughout DLR and the country

Come and learn how we can all use the app.
in Dun Laoghaire Rathdown County Hall
at 1pm Friday March 23rd 2018
Staff and Public Welcome

Presented by Limerick City and County Council's Senior Executive Engineer Anne Goggin who has developed the app which has been designed to be easy to use. It includes photos of the 4 most common invasive plants: Giant hogweed, Himalayan balsam, Japanese knotweed and Winter heliotrope.
