

Theme	Actions				
Cycle	Plans don't show where the east coast cycle lane will take more space, needs to be marked to be more truthful. NTA maps show it on east of park.				
Biodiversity	The way Woodbrook golf has developed 2 fields is not what was agreed: Biodiversity and public access. completely razed to the ground 3 days after the meeting and no effort to replant. Eoin and Paul to look in and see if any enforcement ongoing	The boards highlight nesting boxes for sand martins, not sure if boxes are suitable for sand martins, they need a block wall/resting bank. Having them as the image on the boards and painting it as a big win for the sand martins is disingenuous. Action: Boards to be updated with visual of a different bird for the next boxes			
Financial	Give budget and timeline for stages 1 and 2				
Environmental Impact	The Environmental Impact Study undertaken in relation to the sports zone by its own admission was not carried out at an optimal time for assessing mammals and birds. It admitted that the meadow could be part of alarger territorial range for wildlife. Relying on reported sightings on the Biodiverseity website is not an accurate way to assess the presence of birds and mammals. Few people will go to the trouble of recording sightings.	Natural drainage of the park has been interfered with by sewage services that were put in years ago and nothing has been done to address it. The old pond by the cricket pitch has no water anymore and all the water naturally runs into the sewage pipes. Appreciate that this is not your remit, but makes the point that more joint up thinking between council departments is required Council agreed to look into this further			
Floodlights	Have Cuala made an application for floodlights in Hyde Park? <b>Action: Eoin to come back to Jaime on this</b>				
Parking & traffic	No traffic modelling done. Can't rely on sports clubs to be unbiased in own reporting	Traffic report took place during a period when clubs and park run weren't active. Not going to represent the reality at peak times. <b>Action: Council to carry out additional surveys during busy periods</b>			
Plans	Phase 1 proposed Layout: Discrepancy in maps - basketball court missing some Can you show levels/elevations of pavements especially where new gradiets/ramps are being proposed	Is there images of what the actual view walking around the park will be? Can't tell from drawings	QR code scan - only brings user to timeline of stages- not more detailed drawing	In reference to needing to know what options the council have been looking at. A: we could come back to you, providing wider context and potential opportunities	Can you show levels/elevations of pavements especially where new gradiets/ramps are being proposed
Zoning	Can you share details of what land in the area you've considered acquiring and why it's not possible? <b>Action: Council to share report showing zonings of surrounding land and what could potentially be bought in future</b>				
Sports	The demand for pitches and sports facilities that is cited in the plans isn't well documented. Share reports on this or hire an independent consultant to survey this demand properly
