

Municipal Services Dept.

Water Services Section Level 3 County Hall Dún Laoghaire Co, Dublin

www.dlrcoco.ie

Surface Water Connection Application Conditions

All applicants are advised that a connection will only be provided on condition that the development complies with the requirements of the Sanitary Authority (Local Government Planning & Control) Act 1990). In particular, applicants should note the following:

- 1. Dún Laoghaire-Rathdown County Council will carry out all connection work to public sewers at the applicant's expense (unless otherwise agreed by the Drainage Section).
- 2. Connections to the public sewer **will not be granted under any circumstances** until the internal drainage layout has been completed in accordance with the appropriate Planning Permission conditions.
- **3.** A site location map, a drawing showing the location of the public sewer and the proposed connection and a drawing detailing the 'as constructed' drainage layout must be submitted, in A3 or A4 format.

(Note: If any of these drawings are not provided the application will <u>not</u> be processed).

- 4. If any Public Area is being opened (i.e. road, footpath or grass margin) a **Road Opening Licence must be obtained prior to connection**. Licenses must be applied for on-line at www.rmo.ie.
- 5. It is a matter for the applicant to ensure that they have adequate fall from their site to the public sewer. In general, the outgoing invert level of the connection pipe should allow for a fall of at least 1:100 to the crown level of the receiving public sewer. Details regarding positions and levels of public sewers can be requested from the **Technical Services Section (ph. 01 2054700) or e-mail** info@dlrcoco.ie
- Applicants must investigate the location of adjacent services and ensure that there is an unobstructed route from the site to the public sewer to allow the connection work to proceed.

Applicants should note that the connection process takes a minimum of 5 weeks to complete.
