

The Temperature Dragon

Written and illustrated by Izzy Finnie

Age 7

Typed by Mum.

One day I was out in my garden playing because we had no school, it was closed and my mum was at home with us because she had no work. We had to stay home and stay safe because of Corona Virus. It makes people cough and feel hot and can make old people very sick and they need to stay at home for 14 days or if they need help from the doctor they go to hospital. A lot of people feel better after they do this and it stops other people getting sick. I was playing with my toys and I saw a bird flying in the sky, he was black and white but when I looked closely I saw something flying beside him. I couldn't see properly so I went to get on the trampoline to jump higher to see it better. It must have seen me jumping and came down into the garden beside me. I think at first I was a little scared because I didn't know what it was, when I looked closer it was a dragon !!! She was the same size as my little dog Frankie. She was green with orange spots, she was cute. She opened her mouth and she didn't have sharp teeth, she wasn't scary and she start talking to me.

Her name was Corona and she was here to scan people to see if they had a temperature. She used her eyes to look at people and see how hot they were using her fire flames. Feeling hot and other things showed if people might have corona virus and she told them to go home and feel better after a couple of weeks, this is why things were different but she was keeping us safe. She wanted some water after a long day scanning so my mum gave her some and let her stay with us for the night. She was a good dragon she ate all of her dinner and played with Frankie. She was a little bit naughty in the night she went down to the fridge and ate lots of food and took some clothes from the washing to make a bed and fell asleep on them. The next day before she was going back to work she asked me did I want to fly around with her. It was so cool I was on her back and we went 5km around the house, she flew me over the sea. We saw the pier where lots of people walk but there was no one there and even Teddy's ice-cream was closed!

She left to do her work and after a few weeks we were allowed to go out more and see more people some wore masks and they had funny emoji faces on them. I think the dragon helped us and I like when she came to visit.
