

What is the benefit of planting native woodlands?

Creates new habitats and ecological corridors

Enriches soils and ground floor canopies

LET'S PLANT SOME TREES!

DLR Parks are planting community woodlands and need your help!

We need volunteers to help plant 3500 native Irish woodland trees at Shanganagh Cliffs. You can make a lasting impression in your local community for generations. Encourage neighbours, friends and family to join.

The trees will be very young native trees, densely planted and comprised of species such as Oak, Birch, Alder, Spindle, Hawthorn, Hazel, providing habitat for birds and pollinators, improving air quality and enriching the natural environment.

WHEN: SATURDAY 2nd & 9th MARCH

WHERE: SHANGANAGH CLIFFS

TIME: 10AM - 3PM

For more information on how to get involved please email: parksconsultations@dlrcoco.ie before the 19th February 2024
Ref: Shanganagh Cliffs Tree Planting.

Improves natural flood defenses and water retention

Helps improve air quality, biodiversity, as well as human health and wellbeing
