

What is the benefit of planting native trees?

Creates new habitats and ecological corridors

Enriches soils and ground floor canopies

Improves natural flood defenses and water retention

Helps improve air quality, biodiversity, as well as human health and wellbeing

LET'S PLANT SOME TREES!

DLR Parks are planting community woodlands and need your help!

We need volunteers to help plant 4000 native Irish woodland trees.

You can make a lasting impression in your local community for generations. Encourage neighbours, friends and family to join us.

The trees will be very young native trees, densely planted and comprised of species such as Oak, Birch, Alder, Spindle, Hawthorn, Hazel, providing habitats for birds and pollinators, improving air quality and enriching the natural environment.

WHEN: SATURDAY 16th & 23rd MARCH

WHERE: CLONKEEN PARK (OPPOSITE MEADOWVALE TC)

TIME: 10AM - 3PM

For more information on how to get involved please email: parksconsultations@dlrcoco.ie before the 1st March 2024

Ref: Clonkeen Park Tree Planting.
